

## Quality: Elevating Tower Precision

There has never been a quality issue with a Korindo Wind tower, ever. We do the job right the first time every time.

### The Power of Precision

#### Our quality is powered by:

- ISO 14001 and ISO 9001:2000 certifications
- The most advanced precision equipment available
- 100 percent AWS-certified welders
- Welding certified for both AWS and European (EN) standards
- Certified inspectors for welding, coating, ultrasonic and non-destructive testing
- Continuous training and improvement
- Testing – Visual, Dimensional, Ultrasonic, Radiographic, Destructive and Magnetic Particle Examination

We inspect for quality at every point of the process and document every step with precision to ensure traceability. If you have special requirements for inspection and documentation, we'll meet them.

We manufacture sections to American, European and Asian standards. Since we deliver onshore and offshore towers all over the world, we can help you convert specs and ensure they are appropriate for their final destination. That gives you the additional advantage of being able to use one supplier for all your projects, no matter where they are.

Korindo Wind is an ISO 14001 and ISO 9001:2000 certified manufacturer of high quality wind towers and monopiles with an 800-tower annual capacity. We have delivered more than 600 towers for U.S. projects and nearly 1,000 around the world. We consistently deliver the highest quality towers, and Korindo Wind has a perfect on-time delivery record.

# Equipped For Precision

The Korindo Wind plant is outfitted with the latest high-tech, precision manufacturing and measuring equipment.

Marking, Cutting, Beveling	3	CNC Plasma Cutting Machines (Max 40 tons x 3,300 x 36,000)
	1	CNC Flame Cutting Machine (Max 300 tons x 3,300 x 18,000)
	20	Flame Beveling Machines
Bending	1	DAVI 3080 (Max 80 tons x 3,100)
	2	DAVI 3060 (Max 60 tons x 3,100)
	1	DAVI 3080 (Max 45 tons x 3,100)
Fit-Up & Welding	54	Rotators for Fit-Up & Welding (Max 100 tons)
	22	Tandem SAW Systems
	5	SAW Tractor
Surface Treatment	4	Shot Blast Rooms
	14	Paint Shop Rooms
	12	Paint Spray Systems
	2	Arc Spray Metalizing Machines
	14	Rotators for Blast & Painting
Cranes	2	Overhead (15 ton)
	18	Overhead (20 ton)
	8	Overhead (40 ton)
	1	Gantry (15 ton)
	1	Gantry (20 ton)
	3	Gantry (80 ton)
	2	Mobile (100 ton)

## Let's Generate Some Power

Korindo Wind manufactures, delivers and supports wind towers with precision every step of the way, and we won't be satisfied until you are. To start your project with the precision of Korindo Wind, contact us today.

## Equipped For Precision

The Korindo Wind plant is outfitted with the latest high-tech, precision manufacturing and measuring equipment.

### Marking, Cutting, Beveling

- 3 CNC Plasma Cutting Machines (Max 40 tons x 3,300 x 36,000)
- 1 CNC Flame Cutting Machine (Max 300 tons x 3,300 x 18,000)
- 20 Flame Beveling Machines

### Bending

- 1 DAVI 3080 (Max 80 tons x 3,100)
- 2 DAVI 3060 (Max 60 tons x 3,100)
- 1 DAVI 3080 (Max 45 tons x 3,100)

### Fit-Up & Welding

- 54 Rotators for Fit-Up & Welding (Max 100 tons)
- 22 Tandem SAW Systems
- 5 SAW Tractor

### Surface Treatment

- 4 Shot Blast Rooms
- 14 Paint Shop Rooms
- 12 Paint Spray Systems
- 2 Arc Spray Metalizing Machines
- 14 Rotators for Blast & Painting

### Cranes

- 2 Overhead (15 ton)
- 18 Overhead (20 ton)
- 8 Overhead (40 ton)
- 1 Gantry (15 ton)
- 1 Gantry (20 ton)
- 3 Gantry (80 ton)
- 2 Mobile (100 ton)

### Onshore & Offshore Tower Capabilities

(Maximum Sizes)

Diameter	7.5 m
Steel Thickness	80 mm
Weight	100 tons/section

### Factory Area

(Square Footage)

Fabrication	406,295
Blasting & Painting	71,429
Internal Assembly	918,323
Storage	2,020,752
<b>TOTAL</b>	<b>3,416,799</b>

## Precision Logistics<sup>SM</sup> : Comprehensive Solution, No Risk

Korindo Wind's proprietary comprehensive solution, Precision Logistics<sup>SM</sup>, encompasses every detail from the moment we take your order until you accept your tower sections.

### The Power of Precision

- Coordinating shipping – overseas and domestic (if desired)
- Ensuring compliance of sections with import laws or restrictions of the destination
- Researching the port to make sure it has the equipment, infrastructure and storage necessary to handle the sections
- Negotiating port fees
- Coordinating with port labor and ensuring workers have specific instructions for handling towers safely and efficiently
- Use of Korindo Wind's proprietary stacking frames
- Delivered Duty Paid (DDP) shipping
- Executing the proper bonds
- Paying duties and other customs charges
- Inspections at both ports; repairs of minor transit damage if necessary
- Coordinating port storage if necessary
- Reverse logistics of stacking frames

Korindo Wind is an ISO 14001 and ISO 9001:2000 certified manufacturer of high quality wind towers and monopiles with an 800-tower annual capacity. We have delivered more than 600 towers for U.S. projects and nearly 1,000 around the world. We consistently deliver the highest quality towers, and Korindo Wind has a perfect on-time delivery record.

# Way More Than Towers

With Precision Logistics<sup>SM</sup> you also gain maximum dependability with minimum cost through built-in cost efficiencies, scheduling confidence and overall simplification throughout the process.

Guaranteed On-Time Delivery	Cost Certainty	Best Port Rates
It costs us money to have a ship sitting in port waiting to be loaded, so whatever it takes to complete your towers on time, we'll get it done. And you'll know well in advance exactly when your sections will arrive.	We have negotiated a maximum rate with an overseas shipping partner, so you will know your maximum cost up front and well in advance, regardless of fluctuating fees in a volatile market.	Due to the volume of business we do with U.S. ports, we are able to negotiate the most competitive rate possible for your shipment.

Fewer Inland Costs & Hassles	Batch Delivery	Delivery to Port or Site	One Plant, One QA Professional
All your towers will be delivered to the port closest to your project site so your inland logistics challenges, transport costs and state-by-state permitting issues will be minimized.	All of your tower sections will arrive at your site at the same time, ready to install. Your project manager can schedule cranes and other heavy equipment accordingly to save on rental fees and eliminate costly down time.	In the United States, Korindo Wind has strong ties with a heavy haul partner so we can manage logistics from the port all the way to your project site.	Korindo Wind can cost-effectively deliver high quality sections anywhere in the world. If you are pursuing projects in multiple countries, you can place one quality assurance professional at our factory rather than many in the plants of multiple suppliers.

## Minimum Price, Maximum Dependability

### The Power of Precision

Korindo Wind has built-in advantages that allow us to offer lower overall costs than our domestic competitors in the United States. With lower costs for steel, other raw materials and operating, the landed price of Korindo Wind tower sections to project site is less than the cost of getting towers from a U.S. factory. And with Korindo Wind, you get added value throughout the process:

#### Guaranteed On-Time Delivery

It costs us money to have a ship sitting in port waiting to be loaded, so whatever it takes to complete your towers on time, we'll get it done. And you'll know well in advance exactly when your sections will arrive.

#### Cost Certainty
