

**Pull savings out of
thin air with an
air-source heat pump**

OTTER TAIL
POWER COMPANY

Air-source heat pump

Year-round comfort and efficiency

An air-source heat pump will provide summertime cooling. And because it's up to 300 percent efficient, it also can reduce your heating costs.

- Stay cool all summer.
- Save 30 to 60 percent on heating.
- Receive a tax credit on a qualified unit.

**To learn more call our
Idea Center at 800-493-3299.**

Winter

Heat pumps extract heat from outdoor air to warm your home.

Summer

Heat pumps extract heat and humidity from inside to cool your home.
