

NEW!

ActivEdge

Patent Pending

The floating sectional cutting edge that's, well ... "cutting-edge."

Introducing a floating sectional cutting edge with SnowWolf simplicity, durability and versatility at a reasonable price. The ActivEdge features proprietary composite springs that are a first in the snow-removal industry. They're impervious to water and all other elements, have exceptional rebound characteristics and maintain consistent compression strength in temperatures from -40°F to 150°F. In other words, they last next to forever and don't lose their effectiveness, regardless of plowing or storage conditions.

RETROFIT YOUR CURRENT SNOWWOLF. ActivEdge sections come in 18- and 24-inch lengths, depending on the length of the plow. It can be retrofitted to previously purchased SnowWolf plows by simply replacing the trip edge. It fits any of the following five SnowWolf snowplows with total widths from 6 to 11 feet:

- / **QuattroPlow**
- / **QuattroPlowXT**
- / **QuattroPlowTR**
- / **UltraPlow**
- / **UltraPusherTE**

No more “just scraping by.” Like other traditional sectional plows, the ActivEdge has multiple sections that move, or float, over obstacles or uneven surfaces. Since they conform more closely to the surfaces, regardless of contours or obstacles, the result is a cleaner scrape than is possible with a one-piece plow.

edge sections pivot in addition to moving up and down. Rather than entire moldboard sections rising over obstacles or contours, leaving spaces between sections uncleared, each ActivEdge section pivots to clear a greater percentage of the surface under that particular section. The result is a cleaner cut across the full length of the plow.

However, the ActivEdge's scrape is even cleaner than traditional sectional plows because the cutting

See it in action!

SnowWolfPlows.com/ActivEdge

SIMPLE

Just a few bolts secure cutting edge sections so maintenance and replacement are fast and easy.

DURABLE

AR400 steel and proprietary composite springs for consistent compression, excellent rebounding and long life.

VERSATILE

Available for five plow attachments, new or as replacements for previously purchased plows.

AFFORDABLE

SnowWolf simplicity, dependability and versatility with floating sectional benefits at a reasonable price.
