

Towernators

Our people might not be robots, but when it comes to building zero-defect wind towers, they're machines.

DMI is relentless in the pursuit of perfection. We combine the latest technologies and precision equipment with solid values and innovation to achieve it. With DMI, your wind towers will be done right, on budget, on time, every time...end of story.

Call us today, and Discover Manufacturing Innovation®.

AN OTTERTAIL COMPANY

Let Us Spark Your Idea

DMI is more than a supplier; we're a partner.

We'll build the tower you want, no question. But first we'll review the design and specs and recommend ways to improve your tower with less fabrication expense. In the end, it's your idea, your design, your tower...only better.

Visit us at booth 1030 during Windpower 2007, and Discover Manufacturing Innovation®.

AN OTTERTAIL COMPANY

We Bring Something Heavy to Every Project

Where we come from, quality is a given. It's a guarantee grounded in the Midwestern work ethic of our people. DMI gets it right big time, every time, and we bring much more than that to the table:

- Guaranteed on-time delivery anywhere in North America
- 25 years of heavy steel fabrication experience
- More than 1,500 turbine towers delivered since 1999
- A high-industrial-flow facility that we'll adapt to your needs
- Custom fabrication and assembly of internals
- Advanced quality control for every detail from weld to coating application
- Value-added engineering and logistics coordination

Visit us at booth 620 during WINDPOWER 2005 and Discover Manufacturing Innovation™.
We can do big things together.

We Sweat Steel

Big, heavy, steel wind towers that ace the tests of time and elements – they're our specialty, and we sweat the details so you don't have to.

Unsurpassed service from a single contact. Error-eliminating paperless processes. Reduced manufacturing costs through meticulous engineering. Strength and durability of laser-precision welds. Consistency of high-tech measuring equipment. With DMI, your project will be done right, on budget, on time, every time.

Your Power Is In Our People

In wind energy, it's all about power.

Get the power of quality fabrication with DMI Industries. Our people bring a work ethic unsurpassed in the industry, so you get the tightest controls, attention to the smallest detail and big steel products you can depend on. Bottom line: DMI gets it right big time, every time.

Visit us at booth 404 during at the 21st Annual CanWEA Conference, and see the exciting things DMI is doing in Canada and throughout North America.

When you Discover Manufacturing Innovation®, we can do big things together.

Character of Steel

Solid.

That not only describes our quality steel wind products, but also the workers who fabricate them. They bring the Midwestern work ethic to every project, so you get the tightest controls, attention to the smallest detail and steel products you can depend on. Bottom line: We get it right big time, every time.
