Mobile • Interim • Fixed-Site

Imaging Solutions

## A Transparent Extension of Your Patient Care

DMS Health Technologies delivers an integrated system of diagnostic imaging equipment and staff right to your facility with mobile, interim or fixed-site solutions.

We help customers expand services with multiple modalities, training and support by the most experienced staff in the industry, as well as business development that helps build volume. And it all comes with proven quality and customer service.

# Four Pillars of Success – Yours and Ours

## Quality

We extend the level of care that you, your patients and their physicians desire. We continuously measure, evaluate and improve quality through on-site audits and patient surveys. Those metrics are available on-line, anytime, to all of our customers. In addition, our staff members provide patients the same high level of care they receive from your own staff.

## Customer Service

Just as patient satisfaction is crucial to your facility's success, your satisfaction is crucial to ours. We regularly measure customer satisfaction through independent, third-party surveys. And we're available 24 hours a day to provide technical, applications and service support so you'll never be without answers.

## Solutions

Every healthcare facility's needs and business plans are unique. We'll develop a plan with you based on a thorough understanding of your needs and product lifecycle. We tailor our services to what will work best and make the most sense for your facility and staff—whether it's a mobile, interim, or fixed-site solution.

## Credibility

Trust must be earned, and we're ready to prove ourselves to you. With DMS you'll get more than 35 years of industry experience, the endorsement of several of the nation's largest group purchasing organizations and accreditation by The Joint Commission. And, with the financial strength of Otter Tail Corporation behind us, we are able to invest in the latest technologies, ongoing staff training and overall product development.

## Modalities

- Magnetic Resonance Imaging (MRI)
- Computed Tomography (CT)
- PET/CT
- Nuclear Medicine
- Ultrasound
- Cardiac/Angio
- Bone Densitometry (DEXA)
- Digital Mammography

## Beyond the Technologies

### Service Support

For emergency service, parts, warranty or service plan information, DMS is only a call away 24 hours a day. Our service engineers, who are trained by the original equipment manufacturers, ensure maximum system up-time through preventative and on-site maintenance.

### Training/Staffing

With access to our certified and registered technologists, you'll be able to maintain existing staffing levels without hiring and training new staff. You'll also have back-up staff in place to minimize disruptions of service to your patients. For interim solutions, our applications specialists provide assistance with protocols, image quality and training.

### Project Management

From initial site planning to system checkout to follow-up maintenance, our team will work with you to ensure seamless transitions.

## Mobile, Interim & Fixed-Site Imaging Solutions

## Let Us Show You

With DMS, you can offer the diagnostic imaging solutions your patients and referring physicians need, and in a way that fits your budget and objectives. Contact us today.
